TECM-354

ELECTRIC OPERATING TABLE

Multi-position surgical positioning system

600-960 mm	180 kg	304
ELECTRIC HEIGHT	RATED LOAD	STAINLESS STEEL

Precision positioning | Handheld control | Modular accessories

PRODUCT OVERVIEW

Engineered for versatility

A flexible platform for multiple surgical positioning requirements.

FUNCTIONAL HIGHLIGHTS

01 Electric height & tilt

Height, Trendelenburg, reverse tilt and lateral tilt.

02 Handheld positioning control

Controller-operated electric positioning functions.

03 Articulating patient supports

Adjustable head, back and split leg sections.

04 Medical-grade construction

304 stainless steel body with matte finish.

05 Patient comfort

Contoured memory-sponge mattress surfaces.

06 Flexible procedural setup

Detachable leg sections and positioning accessories.

TECHNICAL DATA

Specifications

TECM-354 electric operating table

Tabletop length	2025 +/- 20 mm
Tabletop width	495 +/- 20 mm
Electric height adjustment	600 +/- 20 to 960 +/- 20 mm
Forward / backward tilt	>=18 deg / >=16 deg
Left / right tilt	>=19 deg / >=19 deg
Head section (manual)	Up >=35 deg / down >=90 deg
Back section (gas spring)	Up >=90 deg / down >=18 deg
Leg sections (manual)	Up >=15 deg / down >=90 deg
Leg section arrangement	Split, detachable; opens to 180 deg
Waist bridge lift	110 +/- 10 mm
Rated load	180 kg
Listed certification	CE (supplier-stated)

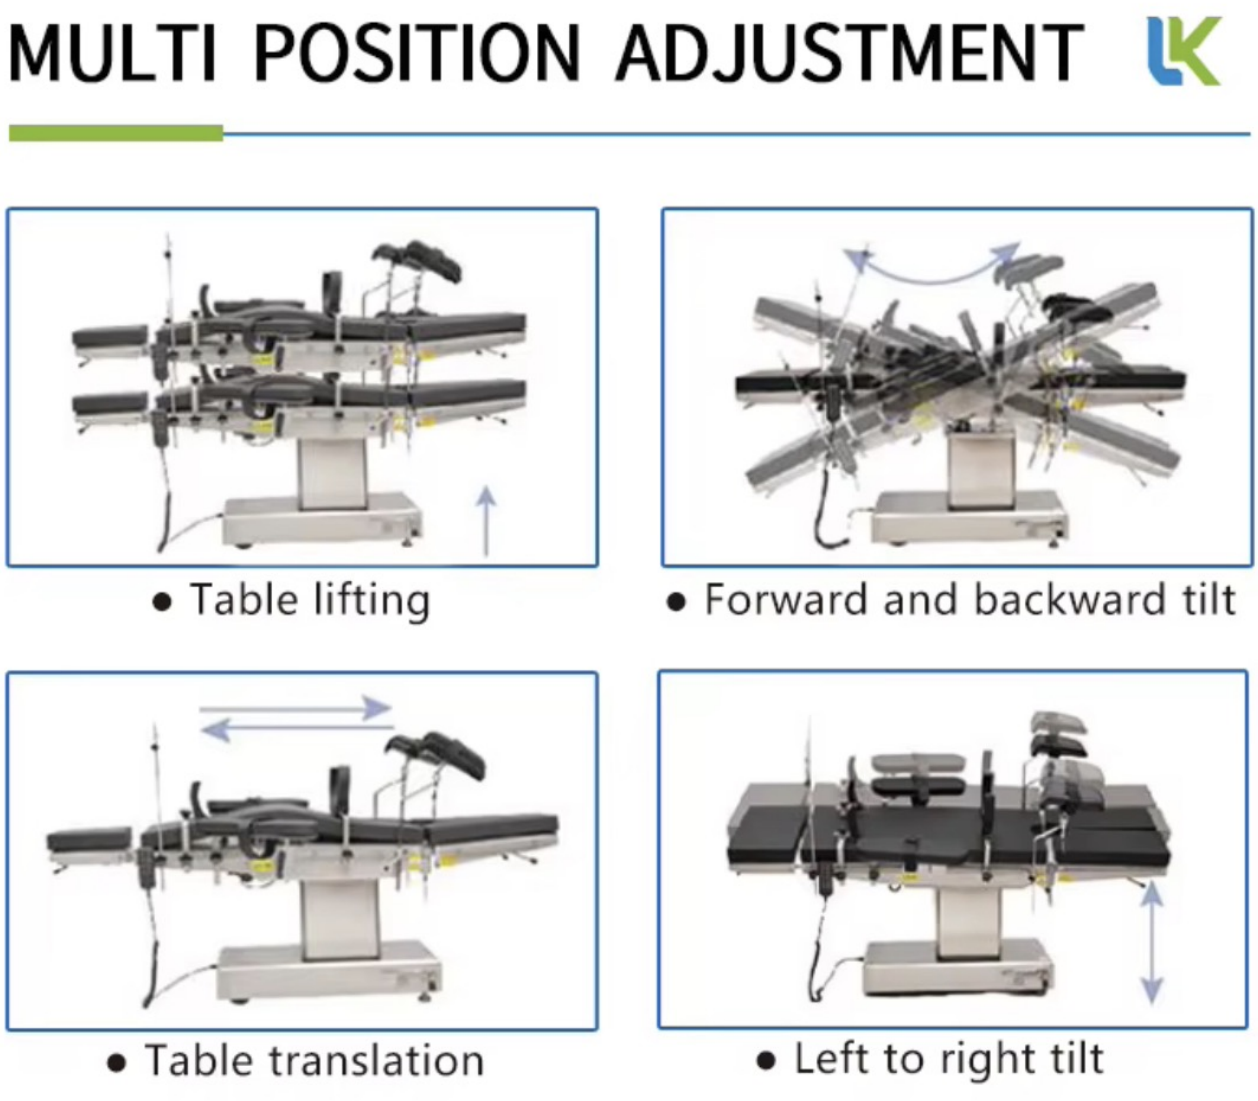

POSITIONING & CONTROL

Electrically operated positioning with handheld controller.
Manual head and leg adjustments; gas-spring assisted back section.
Accessories and configuration may vary by supply package.

Specifications shown are based on the supplied product data.
Certification and exact configuration should be confirmed with the manufacturer.

MULTI-POSITION ADJUSTMENT

Electric lifting, tilting and longitudinal translation

CONSTRUCTION & FEATURES

Stainless steel structure, controller and patient supports

Made of medical grade 304 stainless steel material, with a special matte treatment on the surface for a more modern feel and easier cleaning;

Intelligent handheld controller, the table lifting, table forward and backward tilting, table left and right tilting, back panel folding, bed body translation and other positions are completed by the controller and electric push rod

Memory sponge mattress, evenly sharing the pressure of the carrier, has the advantages of corrosion resistance, acid and alkali resistance, breathability, and easy cleaning. It can naturally shape according to the patient's body temperature, effectively preventing the patient from developing bedsores.

The operating table is equipped with various functional accessories to meet the needs of different surgeries.
